

## Revolutionary Technology

- Fast, guaranteed services - affordable prices
- Multiple quality of service options available
- Easy online booking application
- IP-based data transport
- Compact and lightweight terminals

### Features:

- Door-to-door secure private fibre backhaul
- Reduced satellite fees compared to Ku Band

# NewsSpotter: Built for Broadcast

## Fast, Guaranteed Services at Affordable Prices

NewsSpotter is an excellent occasional use service which makes use of the new KA-SAT technology of Eutelsat with a total capacity of 70 Gbps. This guaranteed high bandwidth service is available in Europe, North Africa and large parts of the Middle East.

## Multiple Quality of Service Options Available

The new generation of lightweight equipment combined with high bandwidth up to 10 Mbps makes it possible to transmit both SD/HD live video and radio broadcast in a fast and highly cost efficient manner.

## Easy Online Booking Application

Bandwidth can be reserved online via a user-friendly self-booking application. Simply log-on and enter your terminal number, location, time slot, the bandwidth required and you are ready to go.

## IP-based Data Transport

The NewsSpotter service is entirely IP based and therefore suitable not only for live video and audio but also for other IP based applications like email, internet, streaming to internet. NewsSpotter can be used in combination with a variety of IP codecs. Please call or email to discuss codec recommendations.

# Advantages

- **Lightweight equipment**  
One suitcase, one person
- **Available**  
Even in locations without infrastructure
- **Fast set up**  
Quick deployment of systems
- **Single push-button operation**  
Operator intervention not required
- **High-quality bandwidth**  
Guaranteed high quality bandwidth for up- and downstreams
- **Cost-effective**  
Affordable services and systems
- **High availability**  
70 Gbps capacity, perfect for occasional or permanent use
- **Technology**  
Seamless integration into IP networks
- **Self-booking**  
Easy online-booking application available
  - for occasional use
  - for planned use and guaranteed reservations

## Compact and Lightweight Terminals

NewsSpotter satellite terminals are built for broadcast: compact and lightweight.

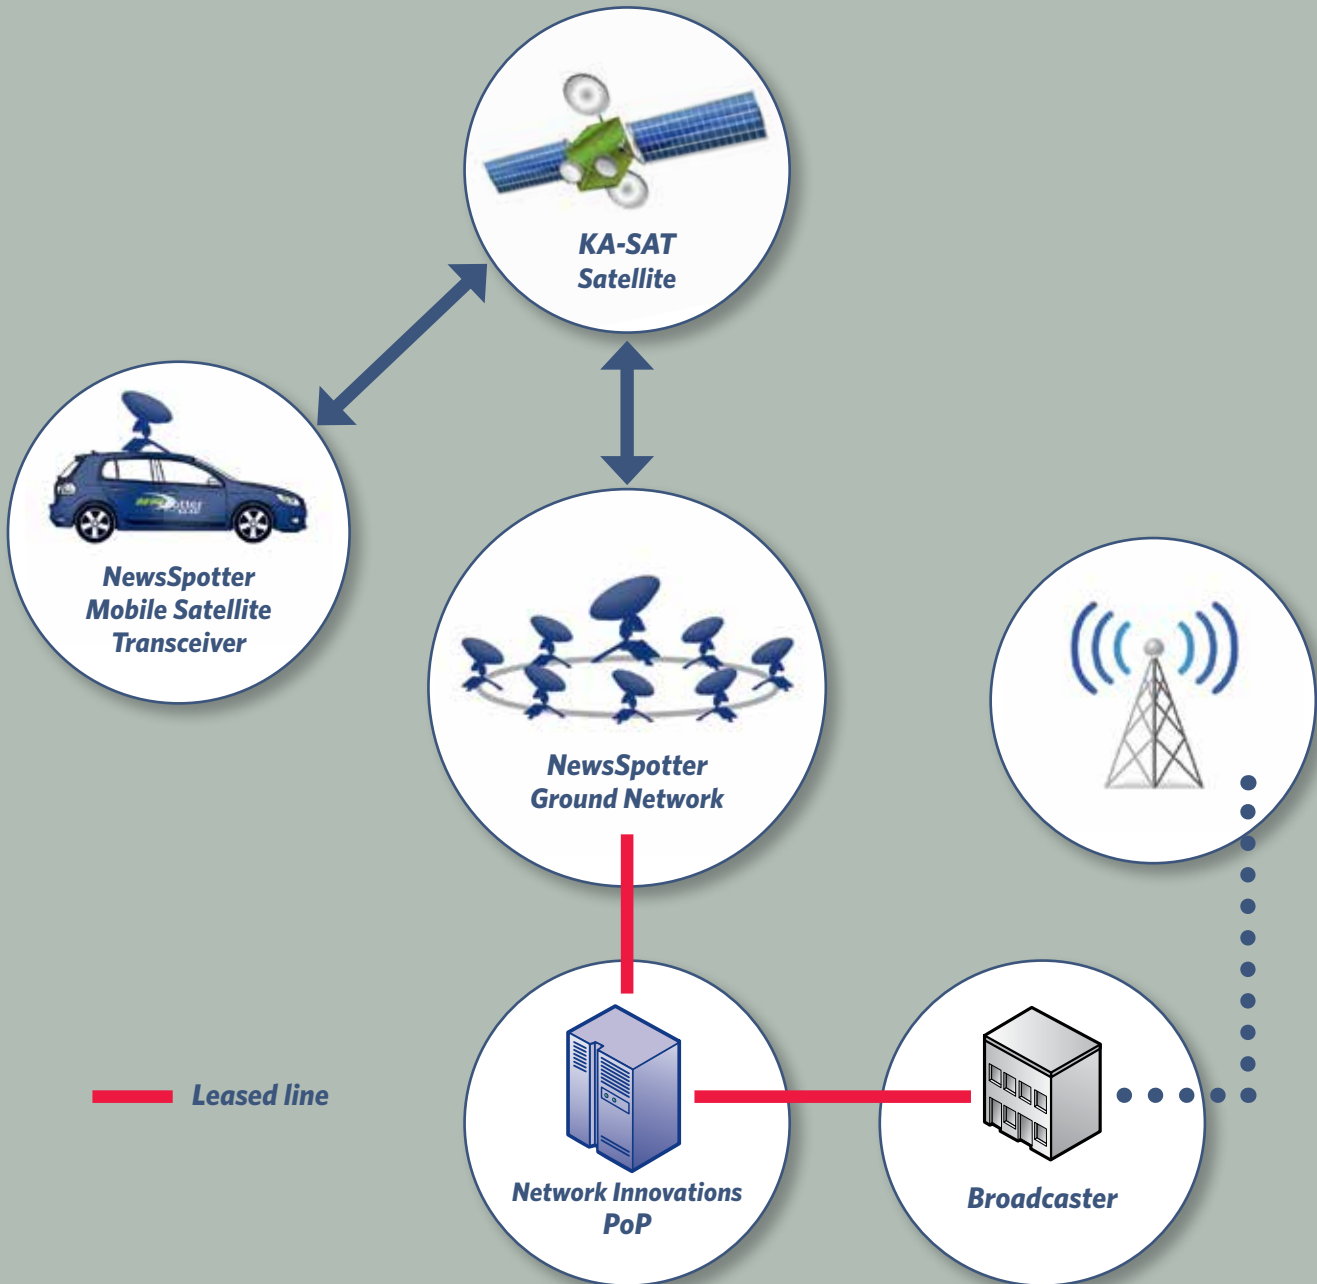

The fly-away terminal is available in a backpack or flight case configuration. The terminals can be pointed manually or automatically. Weighing in the range of 5 to 10 kg for fly-away terminals and dish sizes from 60 to 75 cm.

The drive-away terminal can be mounted on the roof of any car. This means that you can easily carry the terminal with you and instantly connect to the studio for a quick transfer of video and/or audio. The terminals are auto-pointing and available in dish sizes from 75 up to 120 cm.
